BAR Investigation Leads to \$1.8 Million Settlement in Midas Bait and Switch Case

22 Midas shops charged with consumer fraud

The Bureau of Automotive Repair (BAR), in conjunction with the California Attorney General, settled a consumer fraud lawsuit against Maurice Irving Glad and his 22 Midas auto shops in the Central Valley and Bay Area. The settlement comes as a result of a four-year investigation conducted by BAR.

Glad has agreed to pay \$1.8 million. In addition, Glad has agreed to exit the automotive repair business in California and to sell his shops to Midas International. Midas International has agreed to honor the warranties for repairs done under the previous owner.

BAR found that customers were offered cheap brake specials and then charged hundreds of dollars more for unnecessary repairs. The shops also billed customers for parts and services that were not provided.

continued on page 2

A Message from Sherry Mehl, BAR Chief

Partnering with Stakeholders to Ensure the Success of the Smog Check Program

Regular readers of this newsletter know that change is an integral part of the Smog Check Program. In recent years, BAR has added the Low Pressure Fuel Evaporative and the Visible Smoke tests to the Smog Check Program. Testing of diesel-powered vehicles began this past January.

When implementing these changes, the goal has always been the same — to implement improvements that achieve maximum emissions benefits at a low cost to consumers and minimal disruption to Smog Check stations. This goal can only be accomplished by collaborating and communicating with stakeholders.

The implementation of the diesel inspection program is a great example of how establishing cooperative relationships ensures a successful outcome. BAR staff held many workshops with technicians and station owners to develop test procedures, determine training needs, and understand the necessity for subletting repairs. The California Air Resources Board helped BAR draft procedures. The Department of

continued on page 2

Midas Bait and Switch Case *(continued from cover)*

"The Department of Consumer Affairs has zero tolerance for consumer fraud," said Department of Consumer Affairs Director Brian Stiger. "We are very pleased that, in partnership with the Attorney General's Office, we have been able to stop a bad player from further harming both consumers and the hard-working, law-abiding businesses in the auto repair industry."

"For years, Glad ran a bait and switch scam, in which he deceptively lured customers into his Midas shops with cheap brake specials, then charged them hundreds of dollars more for unnecessary repairs," Attorney General Edmund G. Brown Jr. said. "Our settlement makes sure that Glad will never own or operate an auto repair shop in California again."

In June 2008, BAR served an accusation against 22 Northern California Midas shops owned by Maurice Irving Glad. The accusation was the result of an investigation triggered by numerous consumer complaints. BAR used 24 undercover vehicles to gather evidence of 105 alleged violations. The accusation sought the revocation of the Auto Repair Dealer Registrations of all 22 Midas shops.

The Midas Auto Service Center franchises were accused of selling or attempting to sell unneeded goods and services at a substantially higher cost than the advertised "brake specials." BAR also charged that the shops did not intend to sell advertised brake services and repairs at the advertised prices, but intended to entice consumers into more costly transactions. BAR also alleged that the shops charged consumers for parts that were not necessary and, in some cases, not provided.

"Overselling of services has become an increasing problem," said BAR Chief Sherry Mehl. "It amounts to fraud and seriously harms the consumer. That's why we aggressively work to find and shut down these shops."

On average, the shops charged undercover agents almost \$300 in unnecessary brake rotor resurfacings, brake drum repairs, brake adjustments, brake cleaning services, and other services.

Consumers who have a problem with an auto repair facility can file a complaint by calling 800.952.5210. Consumers can also file complaints online at www.autorepair.ca.gov. **B:R**

Partnering with Stakeholders to Ensure Success *(continued from cover)*

Motor Vehicles worked to develop a plan to correctly identify vehicles subject to an inspection. Several manufacturers, including Volkswagen of America and Cummins, Inc. provided reference materials and studies to address compatibility issues. BAR provided the software updates at no cost to stations and required no equipment.

The importance of collaboration and communication is important as BAR moves forward with its next major project: The design and implementation of the BAR-2012 emissions inspection system analyzer. As detailed in another article in this newsletter, BAR-2012 will significantly improve the way stations run their Smog Check business at no additional cost to them.

The principles of collaboration and communication exercised in the implementation of other improvements will continue under BAR-2012. For example, BAR has sought industry input on those deficiencies of the BAR-97 that should be addressed in BAR-2012. BAR has also established a page on its Web site to keep stakeholders informed of the project's progress. Regular updates will also be given at Bureau Advisory Group meetings and be addressed through articles in this newsletter.

The importance of the BAR-2012 EIS to BAR and industry cannot be understated. As Chief, I am committed to keeping you apprised of our progress. In turn, I encourage you to participate in the development process. **B:R**

BAR Begins Work on BAR-97 Replacement

New analyzer scheduled for 2012 implementation

Many say that the heart of the Smog Check Program is the BAR-97 Emissions Inspection System (EIS). Currently, over 7,700 EIS units housed at over 7,000 Smog Check stations throughout the State collect over one million records every month. This information is key to identifying and fixing high-polluting vehicles.

Although the importance of the EIS to the Smog Check Program cannot be understated, the technology behind the BAR-97 is dated. In fact, the current EIS is over 12 years old. This outdated technology has adversely affected BAR's ability to adopt improvements to the Smog Check Program.

With the deficiencies of the BAR-97 in mind, BAR has undertaken the first steps toward developing a successor EIS. Named BAR-2012 in anticipation of its release date of 2012, BAR has identified five key issues with the existing system and the proposed solutions under the new system. They are as follows:

> RELIABILITY

Issue: Most BAR-97 analyzers run on computers containing outdated technology. As a result, these systems lack the capabilities BAR needs to store and process vehicle inspection information. In addition, the current operating systems are no longer supported by their manufacturers.

Solution: The computers used in the BAR-2012 analyzer will be modern and commonly available. In addition, BAR-2012 will be designed to accept new computers as they become available. Finally, the operating systems will be a Unix-derivative that can be upgraded as appropriate.

> COST

Issue: Smog Check stations must rely on their BAR-97 manufacturer for service because of the proprietary nature of the hardware and software. As a result, stations cannot self-service their equipment and must often pay for costly service contracts. It also often results in stations having unnecessary downtime.

Solution: Under BAR-2012, Smog Check stations will have the ability to contract for service, much as they do today. However, the BAR-2012 EIS will be structured so that station owners will be able to self-service their equipment components, which should help reduce costs and, possibly, downtime.

> FLEXIBILITY

Issue: The proprietary software and the variety of software languages and operating systems used in the BAR-97 EIS often hamper BAR's ability to have the Smog Check Program evolve to reflect changes in motor vehicle technology.

Solution: The BAR-2012 EIS software will be State-owned. As the Smog Check Program evolves, BAR will be responsible for upgrading EIS software.

> SECURITY

Issue: The BAR-97 has several security deficiencies. For example, BAR has difficulty determining whether the licensed technician is actually conducting the Smog Check inspection. In addition, thousands of current and former Smog Check technicians have or have had access to the algorithm that creates software passwords, yet BAR has been unable to change the password algorithm due to the lack of control over the software. Finally, computer security is less than optimal as each manufacturer uses a different method to access the operating system in order to service the BAR-97 EIS.

Solution: BAR-2012 will have the ability to better identify the licensed technician who is performing the Smog Check inspection. The new analyzer will also have improved password security.

> COMMUNICATION

Issue: The current dial-up connection between the BAR-97 analyzer and the central database does not accommodate the transmission of large reference files. Due to the slow speed of the connection, BAR cannot make pass/fail decisions based on information collected during a test.

Solution: Under BAR-2012, all communication will be through the Internet, increasing communication speed. BAR will also have the ability to tailor pass/fail decisions on a real-time basis.

The development of the BAR-2012 analyzer represents a significant undertaking by the Bureau. Keeping stakeholders apprised of this project's progress is critical to its success. Updates about this project will be included in future newsletters and can be found on our Web site at <http://www.smogcheck.ca.gov/bar2012/index.html>. **B:R**

We get questions...

How Do I Register My Limited Liability Company?

What is a Limited Liability Company (LLC)?

An LLC is a legal entity, or form of business, that provides limited personal liability to the company's owners for any debt incurred or legal actions taken against the company.

Is an LLC required to be registered with the Bureau of Automotive Repair (BAR)?

Yes, a company that engages in the business of repairing or diagnosing malfunctions of motor vehicles for compensation must be registered with BAR.

How do I register as an LLC with BAR?

To register as an LLC, you need to complete the LLC application and submit the \$200 fee. If you are also adding a Smog Check, lamp and/or brake station you must submit the correct application along with the applicable fees. Applications can be obtained at www.smogcheck.ca.gov or by calling the Department of Consumer Affairs at 800.952.5210 or BAR's Licensing Unit at 916.255.3145.

How do I obtain the required permits to complete the LLC application in its entirety?

- > **Domestic or foreign LLC number.**
Contact the California Secretary of State's Office at 916.653.6814 or obtain the forms at www.sos.ca.gov/business/be/forms.htm#llc.
- > **Seller permit number.**
Contact the California State Board of Equalization at 800.400.7115 or obtain the forms at www.boe.ca.gov/sutax/staxformsn.htm.
- > **Federal employer identification number.**
Contact the Internal Revenue Service at 800.829.3676, or obtain the forms at www.irs.gov/pub/irs-pdf/fss4.pdf.
- > **Local jurisdiction requirements/permits/licenses.**
Contact the California Environmental Protection Agency's CalGOLD Program at 916.323.2514 or visit them online at www.calgold.ca.gov.

In addition to the completed LLC application are there other documents required?

Yes, an operating agreement is required.

What is an operating agreement?

An operating agreement is a written agreement among LLC members governing the LLC business, and members' financial and managerial rights and duties. In single

member LLCs, an operating agreement is a declaration of the structure that the member has chosen for the company. For more information regarding an operating agreement please seek legal counsel for assistance.

What is a member?

A member is a person or entity that owns a percentage of interest in an LLC. Members are similar to shareholders in a corporation. A member can be an Individual, a Partnership, a Corporation, a Trust or a Limited Liability Company.

Do all members need to sign the LLC application?

No. Only one representative, who is also a member, is required to sign the application.

Do I need to list all persons who are members of the LLC on the application?

You must list all persons on the application as follows:

- > **Partnership** — list all partners;
- > **Corporation** — list the president, secretary, and treasurer;
- > **Trust** — list every trustee;
- > **Limited Liability Company** — list all members.

Do I need to notify BAR with any member changes?

Yes, if you are already registered as an LLC and also own a licensed station and are adding or deleting a member, you must submit a new LLC application and fee.

If you need further assisting on completing an LLC registration, please contact BAR's Licensing Unit at 916.255.3145 or e-mail us at BARLicensing_Info@dca.ca.gov. **B:R**

Career Opportunities at BAR

Do you like cars and helping consumers? Are you interested in a rewarding career that helps to improve the air we breathe? Then the Bureau of Automotive Repair (BAR) may be the place for you!

Beginning this spring, BAR fundamentally changed how it recruits candidates for civil service positions. Previously, in order to apply for a position at BAR, candidates had to take an examination. Typically, examinations were offered every few years, which limited BAR's ability to recruit and fill positions. Now, BAR offers continuous examinations online 24/7. The examinations consist of life experience questions. Upon completing the examination, candidates receive their scores immediately. Candidates who score well may then be called for a hiring interview.

"I am really excited about this new examination process," states Sherry Mehl, Chief of BAR. "Previously, it was often difficult to recruit talented individuals because the examination cycle was so infrequent. Now, getting a job at the Bureau is practically just a click of the mouse away," she notes.

BAR uses a variety of classifications that perform a variety of duties. For example, Program Representatives conduct inspections, mediate consumer complaints, and undertake investigations. Air Quality Engineers conduct studies, certify equipment, and assume responsibilities critical to the success of the Smog Check Program.

BAR uses a variety of classifications that perform a variety of duties.

"Now is a great time to work for the State," says Mehl. "There is a considerable degree of stability working for BAR and benefits are excellent."

BAR is continually recruiting to fill entry-level, journey, and management positions. To learn more about career opportunities at BAR, please visit www.smogcheck.ca.gov or contact Jessica Stinson at 916.255.0612. **BAR**

BAR Is Looking for a Few Good Events

Education is key to protecting consumers

The Bureau of Automotive Repair (BAR) works tirelessly to ensure that California consumers and businesses have a safe, fair, and competitive marketplace.

One way of protecting consumers is to provide them information about the marketplace. BAR does this through various publications and its Web site. Over the years, BAR has found that personal interaction with the general public and licensees is often the most effective way of communicating BAR's message.

"BAR has outstanding staff who are willing and able to provide presentations or attend events that get out the word on the automotive repair and Smog Check marketplace," notes BAR Chief Sherry Mehl. "Staff are available to make presentations or attend events sponsored by consumer groups, community-based organizations, government agencies, and other interested groups throughout California.

If you know of a community event, festival, meeting, or other occasion that would benefit a group of people, please let us know. No event is too big or too small.

BAR staff at the Green Expo in South Pasadena.

For more information about BAR's consumer education efforts or to schedule BAR staff for an event, please contact Debbie Romani, BAR Outreach Coordinator, at 916.255.1335 or by e-mail at Debbie_Romani@dca.ca.gov. **B!R**

Gasoline/Electric Hybrid Smog Checks

Vehicles are currently exempt from inspections

Stations may be seeing more owners of gasoline/electric hybrid vehicles requesting a Smog Check inspection, as directed by their Department of Motor Vehicle (DMV) registration renewal notice. Gasoline/electric hybrid vehicles are currently exempt from testing and are not compatible with the current testing platform.

After a careful review, DMV determined that the "mode of power" classification files are erroneous for some gasoline/electric hybrid vehicles. This has caused some vehicle registration renewal notices to incorrectly state that a Smog Check is required.

If a customer requests a Smog Check for their gasoline/electric hybrid vehicle, do not perform the test. Instead, inform the customer to contact DMV to correct the mode of power classification from G (gasoline) to Q (gasoline/electric hybrid). **B!R**

Quick Tip

New ASM Emission Standards and LPFET Testability Available Online

The Bureau of Automotive Repair (BAR) has added two new features to its Web site. One feature allows you to view a specific vehicle's cutpoints. The second feature displays the testability of vehicles subject to the Low Pressure Fuel Evaporative Test (LPFET). To learn more about these features, visit us online at www.smogcheck.ca.gov under "Quick Hits." **B!R**

Green Station Recognition Program One Year Later

Program proves popular with participating businesses

About a year ago, the Bureau of Automotive Repair (BAR) began partnering with the Department of Toxic Substances Control (DTSC) to implement the Green Station Recognition Program.

The goal of the Green Station Recognition Program is to encourage businesses around California to handle and dispose of the toxic substances generated during the course of their business in an environmentally friendly manner. The Program also helps reduce exposure to hazardous chemicals and potential ground pollution leading to a cleaner environment.

One year later, the benefits of the Program are obvious. Charles Spiteri of Spiteri's Complete Auto in Belmont appreciates the Program. "My customers feel more comfortable coming to my business knowing their business is responsible in disposing of toxic waste in a proper manner." Kevin Donohoe, owner of Pacific Motor Service in Monterey, adds "It shows that a business can be run cleaner, especially since my industry often has a bad name in terms of pollution."

There is no cost to join the Green Station Recognition Program. Nor do businesses incur ongoing costs to remain active in the Program. In fact, Larry Moore of Larry Auto Works in Mountain View notes that the program actually saves him money. "Being green has really helped my business," he says. "I can actually make money by keeping track of the recyclable products and legitimately itemizing so customers pay for the recycling of coolant, oil, brake fluid, power steering fluid, transmission fluids, and other items removed from a vehicle."

Joining the Green Station Recognition Program is easy. It simply involves completing a few forms and submitting them to DTSC. DTSC will then notify BAR of a shop's admittance into the Program. Chris Nelson, service and parts director of Beschhoff Motorcars in San Jose was surprised by how easy and painless the process for joining the program was. "Since my facility already complied with the requirements of the Green Station Program, all I really had to do was complete a few forms," he notes. "The pay-off is big since it shows Beschhoff Motors cares about our community."

If you are interested in having your facility become a Green Station, you can download an application online at www.smogcheckca.gov/greenstationprogram. **B:R**

Green Stations in California

- > **Beshoff Motorcars**, San Jose
- > **British Auto Repair**, Napa
- > **California Star**, Lafayette
- > **Certified Automotive Specialist Inc.**, Glendora
- > **Crow's Auto Care**, South Lake Tahoe
- > **Encinitas Foreign & Domestic Auto Repair**, Encinitas
- > **Larry's Auto Works**, Mountain View
- > **Longo Lexus**, El Monte
- > **Longo Toyota**, El Monte
- > **Mission Hills Automotive**, San Diego

- > **Spiteri's Complete Auto Service**, Belmont
- > **Sunnyvale Volkswagen**, Sunnyvale

Joining the Green Station Recognition Program — as Easy as 1-2-3

To join the Green Station Recognition Program simply follow these steps: Complete the DTSC Model Shop Pollution Prevention Checklist, the "Summarize Your Environmental Benefits" form, and the P2 Opportunity Checklist. Provide a copy of your most recent hazardous material inspection report and an air district report. Mail all documents to DTSC. Upon approval, DTSC will notify BAR of your facility's acceptance into the program and you will receive your Green Station certificate that you can post at your station. **B:R**

Aftermarket Catalytic Converter Inspection Reminder

The California Air Resources Board (ARB) adopted regulations on January 1, 2009, concerning aftermarket catalytic converters. Among other things, these regulations affect the visual inspections technicians must perform to determine if the catalytic converter is an aftermarket catalytic converter, and whether it is legal for the vehicle.

When performing an inspection of a vehicle with an aftermarket catalytic converter, technicians should keep in mind the following:

For aftermarket catalytic converters installed on or after January 1, 2009:

Technicians must verify that all installed aftermarket catalytic converters have an EO number and verify the correct catalytic converters are installed. If an EO number is not found and/or the wrong catalytic converter is installed, the vehicle must fail the inspection.

Until further notice, it is not necessary to check specific vehicle application for non-OBD II equipped vehicles. In these cases, technicians must verify that

the converter(s) is equipped with an EO number and that the converter appears to be properly installed. For OBD II equipped vehicles, technicians must check vehicle specific application. To verify the application, technicians must check the ARB EO parts listings and/or part manufacturer catalogs.

For aftermarket catalytic converters installed before January 1, 2009:

As always, technicians must check that the catalytic converter is present and appears to be properly installed. In cases where technicians find evidence of misapplication, they should check the EO listing, and the parts manufacturer catalog of any other reliable source to verify installation of the correct converter. If the wrong catalytic converter is installed, the vehicle shall fail the inspection. All aftermarket catalytic converters require EO exemption or approval. However, EO numbers were not stamped or affixed to aftermarket catalytic converters produced before January 1, 2009. Appendix G of the Smog Check Reference Guide provides catalyst identification information that technicians may use in verifying catalyst application. **B:R**

BAR Announces New Contract Process for Gold Shield Stations

The Bureau of Automotive Repair (BAR) is always looking for opportunities to improve its partnership with Gold Shield stations in administering the Consumer Assistance Program (CAP).

One of the biggest changes affecting Gold Shield stations

will be the contractual relationship between BAR and the stations. Currently, BAR enters into multi-year contracts with each Gold Shield station. Each contract is then assigned a budget. The budget can only be adjusted through an amendment to the contract.

Beginning this spring, BAR will enter into standard agreements with Gold Shield stations. This means that individual stations will no longer have a contract with a

pre-set budget. It also means that stations will no longer need to monitor their CAP budget and possibly suspend CAP services due to insufficient funds. Instead, BAR will monitor the overall CAP budget and notify all stations if funding for the fiscal year becomes unavailable.

"I've spent a considerable amount of time talking to existing and prospective Gold Shield stations," says CAP manager Tonya Blood. "What I have heard loud and clear is that Gold Shield stations can't always provide their customers the services they demand because shop owners may not have the budget in their CAP contract to fix a vehicle. Changing from a contract to a standard agreement with CAP stations should fix this issue."

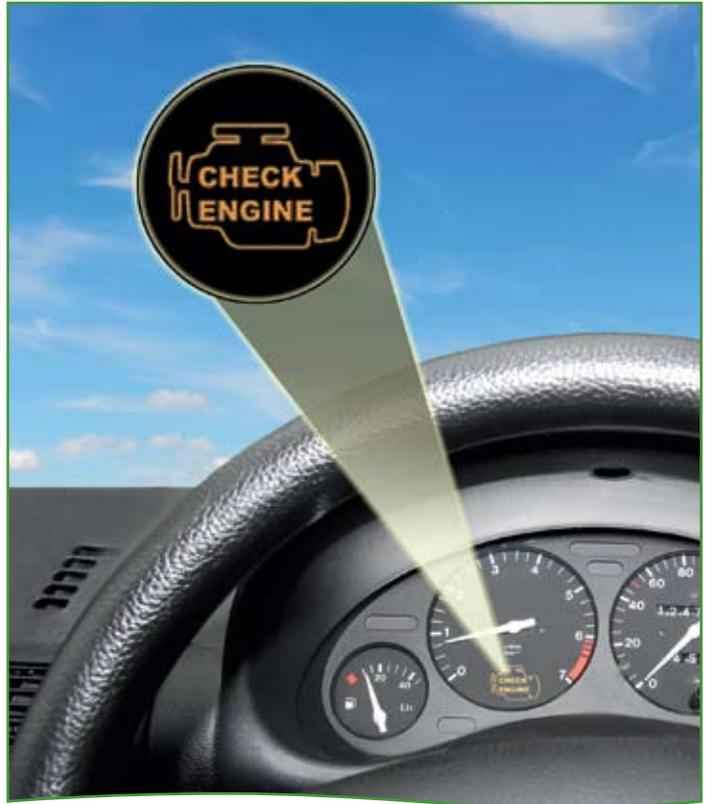

BAR anticipates issuing new standard agreements to Gold Shield stations by July 1, 2010. **B:R**

Illuminated Malfunction Indicator Lights — To Tell or Not to Tell

The Bureau of Automotive Repair (BAR) has noticed a significant increase in the number of consumer complaints concerning Smog Check failures due to an illuminated Malfunction Indicator Light (MIL). Vehicles that have an illuminated MIL automatically fail their Smog Check inspection. Many consumers are complaining that they should have been advised of this fact prior to the completion of the inspection.

Existing law and regulations do not require Smog Check stations to advise their customers that an illuminated MIL will cause a vehicle to fail the test prior to actually performing it. However, in order to better serve your customers, you may want to consider advising them of the consequences of an illuminated MIL. While this practice may send some customers away, it will ultimately foster trust between you and your customer.

You may want to explain to a customer that while they may fail their Smog Check inspection due to the illuminated malfunction indicator light, there may also be other reasons that their vehicle may fail. The only way to know if there are other reasons is to go ahead and have the vehicle tested. **B:R**

Ensuring Proper Transmittal of LPFET Data

The Bureau of Automotive Repair (BAR) has determined that some Low Pressure Fuel Evaporative Test (LPFET) units may not be sending test results to the Data Depot. A couple of reasons may cause this situation.

One reason may be that an incorrect LPFET serial number or station license number has been programmed into the LPFET. The LPFET serial number marked on the outside of the unit must match the programmed serial number. An incorrect station license number typically occurs during either initialization of a BAR EIS or replacement of a LPFET unit. During initialization, BAR field staff enter the station license number into the Data Depot.

Depending on the manufacturer of the unit, shops can fix this situation by doing the following:

> **For SysTech International units:** Go to the "Config Menu," select "Status," and view the Tester Serial

Number. Then press "right arrow" to view the Station License Number that has been entered into the EIS. If the license number is incorrect call SysTech at 866.623.8378.

> **For ESP/Waekon units:** Go to "Status Page," press "Enter," and press "Down Arrow," to check the Station License Number. Then press "Down Arrow" to view the Tester Serial Number. If the license number is incorrect call ESP at 800.695.4377.

Another reason that LPFET data is not being transmitted to the Data Depot may be due to a clock drift problem specific to SysTech LPFET units. This can be corrected by connecting to the Data Depot to update the time and date. Power down the unit overnight, then after powering back up, watch for the time drift several minutes and/or the date to go backwards. **B:R**

Quarterly Bureau Advisory Group Meetings

BAR holds quarterly meetings that are open to the public. These meetings are a great opportunity to learn and discuss issues facing the Bureau and industry. To learn about meeting dates and times and to obtain an agenda, visit www.smogcheck.ca.gov.

November 2009

Airco Smog, Lake Elsinore
Steve A. Hartman, Owner
Order: Automotive Repair Dealer and Smog Check Test-Only Station licenses are revoked. Reimburse BAR \$10,144 if respondent seeks reinstatement of his Automotive Repair Dealer and his Smog Check Test-Only Station licenses or applies for new license or registration. Said \$10,144 cost shall be the joint and severable obligation of respondent Steve A. Hartman and co-respondent Edward Asatryan, EA144197. (11/16/09)

Edward Asatryan, Corona
Technician
Order: Advanced Emission Specialist Technician license is revoked. Reimburse BAR \$10,144 if respondent seeks reinstatement of his advanced emission specialist technician license, or applies for a new license or registration. Said \$10,144 cost shall be the joint and severable obligation of respondent Edward Asatryan, EA144197, and co-respondent Steve A. Hartman. (11/16/09)

El Compita Smog, Pomona
Arturo P. Enriquez, Owner
Order: Automotive Repair Dealer and Smog Check Test-Only Station licenses are revoked. (11/2/09)

Arturo Perez Enriquez, Compton
Technician
Order: Advanced Emission Specialist Technician license is revoked, stayed and placed on five years probation. Respondent shall reimburse BAR \$2,916. (11/2/09)

Eric Louis Martinez, Perris
Technician
Order: Advanced Emissions Specialist Technician license is revoked. BAR waives a portion of its costs in the amount of \$7,065. Payment of the remainder of the Bureau's costs in this matter in the amount of \$10,000 is deferred unless and until the respondent Eric Louis Martinez ever applies for licensure or petitions for reinstatement for any license or registration from BAR, in which case he shall reimburse the \$10,000 in full at the time when such application or petition is made. (11/5/09)

The Smog Guy, Riverside
Vance Edward Rogers, Owner
Order: Automotive Repair Dealer and Smog Check Station licenses are revoked. Respondent shall reimburse the Bureau its costs of investigation and enforcement in the amount of \$19,037 at the time of application for a new or reinstatement of a registration or license issued by BAR. (11/16/09)

CAP FACTS

A statistical look at the Consumer Assistance Program (CAP)*

October through December 2009	
Vehicles Retired	5,520
Vehicles Repaired	13,469
Applications Processed at BAR Field Offices **	5,717
Emissions Reductions (average tons per day)	
Hydrocarbons	129.7
Oxides of Nitrogen	211.2
Carbon Monoxide ***	35.4
Disbursements	
Vehicle Retirement	\$5,561,858
Vehicle Repairs	\$5,414,405
TOTAL Disbursed	\$10,976,263

* This analysis considers a vehicle repaired or retired upon BAR approval of a station or dismantler invoice for payment, rather than the actual date the vehicle is repaired or retired.

** This figure reflects the total number of CAP applications received and processed on the same day at BAR field offices. Most applications were processed while the consumer waited.

*** Carbon Monoxide has been divided by 56 to reflect ARB estimates of the reactivity of CO relative to other hydrocarbon compounds participating in the formation of ozone.
